

VOLCANOES & EARTHQUAKES

Volcanoes and Earthquakes can be caused by the movement of Earth's tectonic plates.

These are called 'Natural Disasters'.

1 How are earthquakes detected?

2 How can we prevent damage from earthquakes?

3 What are 2 names given to the molten rock from volcanoes?

4 What might scientists monitor/measure to predict an eruption?

5 List 2 ways we can keep people safe from these dangers:
